

Downloading Cucumber Jars

These jar files are needed, please download all of these by following the instructions.

1. cucumber-core
2. cucumber-java
3. cucumber-junit
4. cucumber-jvm-deps
5. cucumber-reporting
6. cucumber-testng
7. cucumber-html
8. testng
9. gherkin
10. junit
11. mockito-all
12. cobertura

Option 1:

1. Goto <https://search.maven.org>.
2. Search for <jarname> in the Central Maven Repository. Click on the “jar”.
3. Search for other jar files mentioned above and download these to the same directory.

Option 2:

1. Goto <https://oss.sonatype.org/content/repositories/releases/info/cukes/>
2. Download the latest available version of all the jar files.

cucumber-core, cucumber-java, cucumber-junit – Nice to have the same version.
